- Agrocon Albania operates in accordance with the:
GLOBAL GAP standards GGN:4056186669025

The Soil and the Climatic Conditions

The greenhouses are located in the Krutje area of Lushnje. It is a flat area with warm climates of rare hoarfrost and haze but convenient earth with great opportunities for irrigation. The area is quite favorable for the reason that the requirements for environmental factors are best met such as air temperature, soil temperature, air and ground humidity, light, ventilation, carbon dioxide gas, wind, etc.
